

Wipers | Enerwiper rod wiper

Enerwiper energized rod wipers made up of a wiping element in Neuflon-ptfe or PU or UHMW-PE, and an inox energizing spring.

The special profile and the choice of materials make an extremely reliable component for completely preventing penetration of solid or liquid contaminants in the mechanical organs.

Long term maintenance of the pre-load.

Closed groove

Low friction

Protected wiping lip

Great chemical resistance

APPLICATIONS

Hydraulics and pneumatics

Food and drugs (optional **EU-FDA approved silicone filling**) Optional MOCA certification

Linear speed up to 5 m/sec and slow rotating movements

T range -200 +260°C

ASSEMBLY

Enerwiper spring energized wipers are suitable for assembling in closed groove starting from a minimum rod diameter according with dimensional class

Enerwiper rod wiper	dimensional class	Min. rod diameter
	G	30
	L	70
	H	110
	N	300
	M	500
R	800	

AVAILABILITY

To check the availability:

- choose profile and compound from the drop-down menu
 - input the desired housing class
 - input the desired diameter
- Once obtained the availability, a request for quotation can be sent.
